

KFM

Lasting Conveyor

We do with Perfection

Kumar Footwear Machinery

FROM ANYTHING TO EVERYTHING IN FOOTWEAR MACHINERY

Features

1. This machine is designed with single layer with automatic temperature controllers.
2. The machine has Near Infra Red(NIR) heaters that can penetrate into the gluing layer of the vamp and the bottom, reaching the effects of the drying rapidly.
3. The operation is very easy & flexible having speed control drive so that we can adjust the speed of the conveyor belt according to different materials, improving the quality and the yields of the products.
4. The length of the oven can be made according to the needs. The installation and the disassembling are easy and fast.
5. Having the system of hot air circulation, we save the electric consumption.
6. The temperature of every oven section is controlled automatically and can be adjusted independently. The operation is easy.
7. The outer appearance is sprayed onto with the plastic powder, anti-wearing out, anti-oxidization, and durable.

Technical Specifications

Material	Mild Steel , Stainless Steel
Length	32 Feet / Custom Made
Heating Chambers	One (01)
Heater Type	Normal / IR / NIR
Motor Power	1 Kw
Heating Power	6 Kw
Productivity	1000 Pr / 8 Hr
N.W. / G.W.	400 Kg / 450 Kg
